Projects and

Experience

Lovesome Stables Equitherapy
Lead Developer
This is a relatively straight forward informational site. It has multiple pages full of various information, as well as downloadable documents and media. Responsibilities were to take the old site, give it a face lift, and also bring it into 2017 by making it responsive and mobile friendly as well as using PHP files with HTML that will allow the site to load faster server side for better optimization especially since there are so many images. Used: PHPStorm, JavaScript, HTML5, CSS, Bootstrap Integration

Kentucky Colonels Travel Team
Lead Developer
Very clean and simple responsive design using a JavaScript to have the user navigate instead of the normal click and redirect to a new html page. The client was very adamant about having it be simply but effective, it is responsive, as well as being user friendly. Responsibilities were to start the site from scratch and create content as

well as the site to best show what the team can do. <u>Used:</u> PHPStorm, JavaScript, HTML, CSS, Bootstrap Integration, Google Analytics

Pi Kappa Alpha Fall Rush Flyer   2015
<u>Main Designer</u>
Tasked with creating my fraternities rush flyer for the fall
> Photoshop and Illustrator were the two tools utilized, the process drew inspiration from the past flyers as well as previous designs from various projects
> Flyer was passed around and used to bring in new fraternity men
> Mostly worked off of input given by fellow brothers

In Class Mobile App   2014
<u>Lead Developer</u>
Tasked with developing an app that was interactive and served a purpose. The app has several simple screens where you input your information and then it compiles your info and gives you a cost of how much you will spend on your trip. It has a pie chart as well to show you what is being spent where. Responsibilities were to make the app fully functioning and the greatest challenge was to have persisting data across all pages. <u>Used:</u> AndroidStudio, XML, Java
